All prices exclude V.A.T.

Version 2.13 April 2005

## INVUCARE

InvuCare is mandatory for year one. It covers the user for software updates and second line hotline support. It is NOT a software support contract. InvuCare is always priced at 30% of the total software price per annum. At point of purchase, a two year InvuCare contract is available for list price less 5% and a three year contract for list price less 10%. For example, if an InvuCare contract has a list price of £1,000 for one year, a two year InvuCare contract would cost £1,900 and three years for £2,700 (provided the total sum is paid for at order placement).

## CONCURRENCY

Please note: No Invu products are concurrent licenses, they are all for named users, including the iSeries products. Authorisation for the concurrent requirements must be obtained in writing from the Director of Sales and Marketing or the Director of New Business Development.

## TWIN LICENSING

In the event that a customer wishes to purchase a license for S250 and i200 but for dual use (i.e. for the same named person so as to enable office and remote working) then the customer shall be entitled to receive a 25% discount on the least expensive licence. To be clear if a user wants 5 x S200 for the office and 5 x i250 for home use, and both sets of 5 are for the same users, the discount will apply to S200.

## DATABASE

The Gupta database supplied with Invu is sufficient for up to 150 users. The end user must have their own database when the number of users is larger than this. Invu will work with either Microsoft SQL server or ORACLE. Using either of these databases allows thousands of users to be on the network.

## MULTIPLE ORDERS

If a company wishes to purchase a variety of products at the same site then the end user price will be the addition of the prices of each product (exception being the Cervello range) or the price of the total number of seats of the highest price product whichever is the greater.

## ZONAL OCR AND BARCODE

One Zonal OCR and One Barcode module is included with each network version of Invu. Additional Modules can be supplied at £100 each.

## LINK MANAGER

Link Manager is used to pull files that have been exported from other systems in Invu. This product costs £500.

## SYSTEM ADMINISTRATOR LICENCE

Each S200 and S250 solution includes a free system administrator licence.

## DISASTER RECOVERY LICENCE

All users on the DR system must be the same as on the live system. There are two options for DR Costs - 1) For those users who use Centura SQL Base, the cost will be 15% of the total software cost of the main system. 2) For those users who use Microsoft SQL Server, the cost will be 10% of the total software cost of the main system. No InvuCare will be charged.

## NOTE 1

The CodeFree range of products are additional products to be added to S200 or S250. iSeries products are web based and are based upon an existing S200 or S250 implementation. Neither the web or CodeFree products can be used on their own.

## NOTE 2

The Invu Research Service allows users to maximise the uses of Microsoft Office 2003 and Invu. This service allows users to search, display and send links to documents stored in Invu, to other Invu Research Service Users who are also able to log onto the same system. This product is licensed per user. IIS5 and above must be available at the server end and all users will require Microsoft Office 2003.

## NOTE 3

iVu is a view only version of the i200 Series product with an unlimited licence option over 500 seats.
